Application

1º Surface preparation: the surface to be painted should be clean, dry and free of dust and grease. Apply a first coat of PeñaAkril satin paint (white or the desired colour). Allow to dry at least 24 hours.

2º Obtaining the colour: dye SeaWaves Effect with water-borne or universal De la Peña dyes using the desired colour and mix until obtaining a homogenous hue.

3º Application: with a short nap roller. Try to apply a homogenous coat. Afterwards, create the desired effect with the special tools (rollers, sponges, gloves, etc.). Depending on the temperature and the humidity, you have around 30 minutes before the product dries and stops being manageable. Therefore, it is recommendable not to apply it to large surfaces and not to make straight passes in order to conceal the joint points.
